

KONICA MINOLTA

I WANT TO BE SURE
MY DATA IS SAFE

JUST WHAT YOU NEED – SECURE DATA

You might have read recent reports that questioned the security standards of some production printing systems. And you're right to be asking some crucial questions: "How can I be sure my valuable data is safe from theft?" or "How can I prevent data being stolen from my device or extracted when the hard drive is removed?" The questions are far-reaching, but the answer is simple. If your production printing device is from Konica Minolta, all there is to do is activate its built-in security features. That can be done on your premises – or prior to delivery if you haven't yet decided which device to buy. Once the AccurioPro SECURE safeguards are in place, you can be sure your print data will enjoy uncompromising security. Your AccurioPress device and its hard drive (HDD) will be protected to ensure your data is more than just secure – it will be AccurioPro SECURE!

YOUR MOST VALUABLE AND VULNERABLE BUSINESS ASSET

Of all your business assets it is quite possible that your data is the most valuable – and most vulnerable. But securely safeguarding this asset could not be simpler: AccurioPress SECURE protects your documents, data and corporate information, thus preventing any potential damage to your company’s finances and reputation.

Reassuring peace of mind

Hackers can relatively easily access devices if the default password has never been changed. So we make sure each admin password is changed from default mode to a unique and secure password to prevent unauthorised access. We also equip each AccurioPress device with a control mechanism to ensure the admin password is most securely set, i.e. with a sufficiently safe combination of characters and numbers.

Password-protected documents and hard drive – no data can go astray

Business-critical documents can be stored on the AccurioPress device’s hard drive. If you want an even higher level of security, the hard drive can be encrypted to prevent data being read, even if the hard drive is removed.

Automatic deletion of print jobs

When documents are printed in your business, potentially confidential data is sent to the printer and temporarily stored. To prevent access to such data, AccurioPro SECURE can be set to automatic deletion mode – yet another way of safeguarding business-critical data on your AccurioPress device.

Continuous real time status of your security settings

For your peace of mind you can choose an optional application that highlights at a glance if all your security settings are still in place and re-enforced.

Key considerations for your printing security

AUTHENTICATION

IS ACCESSING YOUR PRINTING FACILITIES SAFE?

DATA PROTECTION

WHAT HAPPENS TO YOUR DATA AFTER YOU SEND IT TO PRINT?

AUTOMATED RULES ENFORCEMENT

ARE YOUR SAFEGUARDS STILL IN PLACE?

AccurioPro Secure covers these three areas and gives you peace of mind when it comes to printing security.

KONICA MINOLTA

THE SIMPLE ROUTE TO SECURING DATA

How do Konica Minolta customers activate the award-winning security features in their AccurioPress?

Simple. They ask Konica Minolta to do it for them.

- All specifications refer to A4-size paper of 80 gsm quality.
- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.
- The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5 % coverage of A4). The actual life of each consumable will vary depending on use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.
- Some of the product illustrations contain optional accessories.
- Specifications and accessories are based on the information available at the time of printing and are subject to change without notice.
- Konica Minolta does not warrant that any prices or specifications mentioned will be error-free.
- All brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.
